

Please help keep our neighbors safe.

After enormous public backlash, Amazon Ring cut ties with Flock-- the company feeding data to ICE agents to help fuel brutal immigration raids and tear families apart. Unfortunately, Amazon still has an active partnership with Axon Enterprise--a surveillance company with known ties to Customs & Border Patrol. Here is how you can protect yourself and your neighbors:

You can help by:

1. Turning off your Amazon Ring camera
2. Enable the end-to-end encryption feature (which effectively blocks Amazon from gaining direct access to the footage). Scan the QR code below to learn more.
3. Part with your camera permanently. This is a bigger ask, but would be a really meaningful action to support and protect all your neighbors.

Thank you so much.
With love!
